### ● Product

Tristone is an 100% acrylic type of homogeneous solid surface, which is produced by a continuous casting process and a complete quality control system. This product makes an ideal finishing material for not only residential housing, but commercial building. Tristone has the quality of easy maintenance, excellent durability against oil, condiments and UV rays. It also is easily worked and glued with wood, metal, plastic and mortar.

### ● Company

Founded in 1973, Lion Chemtech has shown noticeable growth over the last 30 years with good reputation. As one of the leading companies in the fields of Construction Industry and chemical industry, we are quite ready to make our customers satisfied with full service.
